SUMMARY

Senior Software Engineer with 12+ years developing high-scale distributed systems. Expert in full software lifecycle from code to production, specializing in cloud-native architectures, Kubernetes, and observability solutions. Proven track record supporting critical product launches at Elastic and PlayStation, with expertise spanning from Kubernetes development to high-performance analytics tools serving millions of users.

SKILLS

- **Programming:** Golang (6 years), Python (10 years), Bash
- **Cloud & Infrastructure:** Kubernetes (3+ years), AWS (Lambda, Kinesis, EMR, S3, ECS, Glue, Athena), GCP (Dataflow, BigQuery)
- **Elastic Stack:** Elastic Cloud on Kubernetes (ECK), Elastic Agent, Elastic Beats, Kibana, Elastic Integration Development

EXPERIENCE

Senior Software Engineer

Elastic

Platform org - Developer Experience Team

May 2024 - March 2025

- Developed synthetic monitoring framework using `Playwright` for Elastic Cloud Serverless launch, reducing production outages across 8+ engineering teams .
- Served as `Incident Commander` resolving internal/external incidents while improving `Elastic Synthetic monitoring` product experience.
- Implemented company-wide dependency management through `Renovate`, ensuring consistent software dependencies across codebases.

Senior Software Engineer

Elastic

Observability org - Cloud Native Team

March 2022 - May 2024

- Built remote debugging solution for Elastic Beats on Kubernetes using `Go Delve Debugger` and `Tilt` .
- Developed custom Elastic integration for Istio logs and metrics, enabling service mesh performance monitoring.
- Created specialized dashboards for Elastic Kubernetes integration improving cluster visibility.
- Resolved complex customer escalations for Kubernetes deployments while contributing bug fixes to Elastic codebases.

Big Data Engineer

PlayStation

Game Analytics Team

October 2018 - August 2021

- Built high-performance Golang analytics tool transforming query performance from minutes to seconds using `AWS S3`, `Athena`, and `Glue` .
- Developed real-time event processor using `AWS Lambda` and `Python` for enhanced data correlation and insights.
- Delivered end-to-end support for 10+ PlayStation game launches handling application development to AWS infrastructure.
- Created Python video transcoding tool accelerating media content discovery for Studio Engineers.
- Maintained reliable operations of 10+ microservices, 20+ EMR jobs, and 5+ Lambda functions in small team environment.

Senior Software Engineer

Skimlinks

Platform Team

March 2017 - August 2018

- Optimized pipeline runtime using `Google Dataflow` to ingest 120M documents into `Elasticsearch` .
- Migrated data pipeline from on-premise Hadoop to `Google BigQuery` improving query performance and cost efficiency .
- Automated pipeline scheduling through `Airflow` on Kubernetes improving operational visibility.

Software Engineer

BenevolentAI (formerly Stratified Medical)

Platform Team

July 2015 - February 2017

- Optimized Elasticsearch ingestion of 40M scientific publications by 8x (24 to 3 hours) using Spark multi-threading and S3 storage.
- Automated pipeline scheduling using Python Airflow jobs.
- Developed and maintained applications on Apache Mesos and Marathon (Kubernetes predecessors).

Senior Software Engineer

Big Data Partnership (acquired by Teradata)

Training & Consulting

November 2013 - July 2015

- Delivered official Hortonworks Hadoop course at Hadoop Summit for 2 years plus 5+ private corporate courses with 90% positive feedback.
- Led 3-engineer team in 4-month greenfield consulting project implementing complete client solution.
- Achieved high certification scores on developer and administrator exams within months of self-study.

CERTIFICATION

Certified Kubernetes Administrator (CKA)

Linux Foundation

2023 - 2025

Demonstrated expertise in both development and administration of Kubernetes clusters, including application deployment, and production troubleshooting.

EXTRAS

Technical Writer

Cloud Native Engineer Newsletter

June 2023 - Present

- Built 2,300+ subscriber audience creating cloud-native technical content with 4.7K monthly views.

Technical Mentor

Independent Consulting

June 2023 - Present

- Advised CTOs and CEOs on system design decisions and prepared senior engineers for technical interviews achieving a perfect 5-star ratings across 10+ reviews.

Technical Reviewer

Packt Publishing

January 2023 - June 2023

- Technical reviewer for 'Elastic Stack 8.x Cookbook' ensuring code and content accuracy.

EDUCATION

Master's in Computer Science (Software Engineering)

University of Catania

Graduated with honors (110/110 cum laude)

2006 - 2012

Bachelor's in Computer Science (Software Engineering)

University of Palermo

Graduated with honors (110/110 cum laude)

2002 - 2006

LANGUAGES

- Italian (Native)
- English (Bilingual proficiency)
